

# Energy-Efficient Bearing

## 省電軸承座

### For Multi-Impeller Paddlewheel Aerator

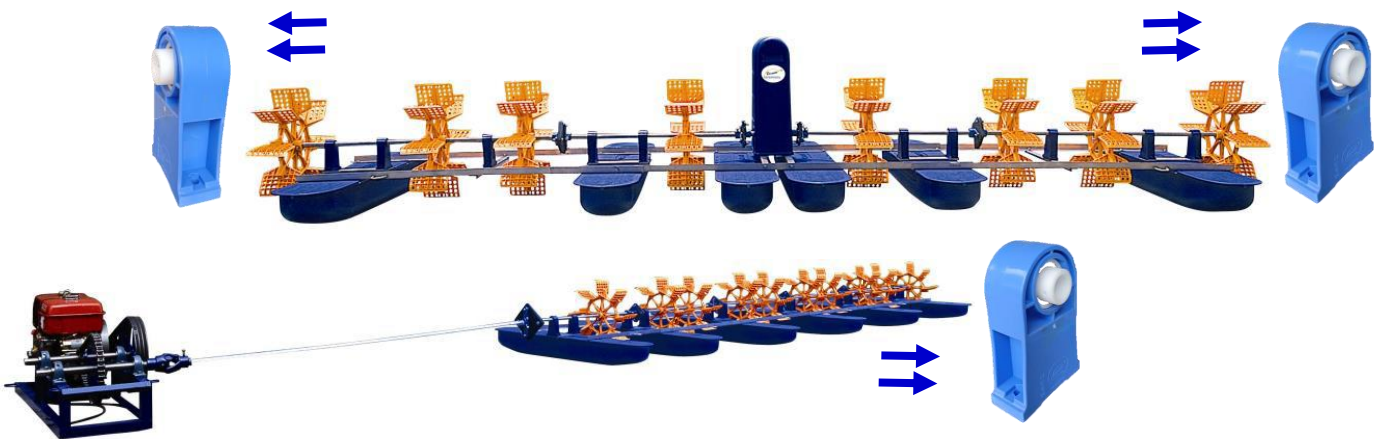

- ✚ 7~11% energy saving comparing with traditional bearing
- ✚ Smooth rotation, more durable & energy saving
- ✚ Equipped with two sets of deep groove ball bearings
- ✚ Easy to replace and maintenance
- ✚ Material : Industrial Plastic
- ✚ Patented model
- ✚ Reduce the force on the stainless steel shaft, prolong the service life of the motor and reducer

\*\*Ball in the middle of the set is a consumable part, available to order & replace separately.

★ Check regularly if each screw is tightly fixed.

### Suitable for Multi-Impeller Paddlewheel Aerator

#### Installation Precautions:

The White Convex Surface faces away from the reducer
